

NEM SOPHAL

Frontend Developer

ABOUT ME

Highly motivated Full-Stack Developer with a strong foundation in building scalable, responsive, and user-centric web applications. Proficient in crafting dynamic front-end experiences using React and Next.js, seamlessly integrated with robust, secure back-end systems powered by Spring Boot. Passionate about logical problem-solving, clean code architecture, and bridging the gap between design and functionality.

EXPERIENCE

Fullstack Development Training

January - July 2026

Korea Software HRD Center

- Full-Stack Development (Final Project)

The HRD Event Hub is a centralized, internal event management platform designed specifically for the HRD center. It serves as a bridge connecting administrators, event organizers, students, and alumni through seamless event planning, interactive engagement, and community building. Whether coordination involves a professional seminar, an alumni networking night, or an internal workshop, this platform streamlines the entire lifecycle of an event from creation to feedback.

IT Support

2022 - 2025

Angkobodia Logistics

- Provided technical support for over 70 staff, resolving hardware, software, network issues.
- Installed, configured, and maintained Windows computers, office applications, and IT equipment.
- Managed user accounts, password resets, and email setup.
- Performed routine system maintenance, software updates, and IT asset management.

HR Assistant, Messenger

2021- 2022

Angkobodia Logistics

- Delivered and collected documents and parcels accurately and on time.
- Coordinated with clients, suppliers, and internal departments to ensure smooth logistics operations.
